About

Mobile Software Engineer with 13+ years of experience designing and delivering high-impact apps at scale. Specialized in Swift and SwiftUI, I build intuitive, scalable, and user-focused products. I enjoy sharing what I learn and thrive on turning complex problems into simple, elegant solutions.

Work Experience

iOS Software Engineer `Spain`
Aug 2021 — Present

Fdj United · Full-Time

Build high-performance iOS apps with Swift, focusing on scalable architecture and seamless user experience. Partner with agile teams to drive technical decisions and implement best practices. Ensure code reliability through robust Unit and UI test coverage in Xcode.

Server-Side Swift Tech Editor `Remote`
Apr 2021 — Present

Kodeco · Part-Time

Serve as a technical editor for server-side Swift content, ensuring high editorial quality and technical precision. Collaborate with contributors to produce clear, accurate, and developer-friendly material that strengthens community learning.

Senior Software Developer `Spain`
Oct 2017 — Aug 2021

Hiberus Tecnología · Full-Time

Led full-cycle mobile development using Xamarin to deliver cross-platform Android and iOS applications. Drove product quality, performance, and timely delivery across diverse projects.

Co-founder `Dominican Republic`
Oct 2014 — Dec 2018

Evoteck · Full-Time

Co-founded and spearheaded mobile app development for products like LBC, RXTranx, and RMS Utilities. Delivered performant, user-centric apps with robust backend integration (Firebase, Web APIs). Managed end-to-end project execution, from architecture and task delegation to release.

Software Developer `Dominican Republic`
Feb 2012 — Oct 2014

Movil Developer And Software (Mdsoft) · Full-Time

Engineered Android apps for pharmaceutical and sales automation sectors, with seamless integration into enterprise platforms like SAP and Microsoft Dynamics. Delivered tools that enhanced operational efficiency and data synchronization.
